

Twisted Wire Nose Piece

This nose piece option is made from 22-gauge floral wire. Since the length of wire is twisted, it is more durable than a single strand, holds up well in the laundry, and is comfortable.

1. Take a 7" piece of 22-gauge wire and fold it in half.

2. Twist the last 1" of the cut ends together and form the twist into a small hook.

3. Insert a small screwdriver into the loop and continue to twist the strands together.

4. Your nose piece should look like this.
